February 9th, 2012

TA: Yasaman Keshtkarjahromi

Schematic, Program Code, and Logic Diagram attached to the end of report.

User Manual:
        To reset the program, press the top most button.
        To start the program and display, press the bottom button.
        The program displays a count, which is incremented every time the center button
        is pressed.

Conclusion:
        My circuit functions as the experiment specifies. Coding and Programming were
not difficult, although silly mistakes did slow my progress a bit.
